

Security System:

- ① Set system password PWS1, -PWS4; activate PULLOAD to store. Scramble inputs PWS1, -PWS4 after load complete.
- ② Applicant sets APPLY - Apply to correct password. Press PWTTEST. Grant LED will illuminate.
- ③ If password incorrect, grant will not be lit when PWTTEST acquired

Notes:

Use pulse switches for PULLOAD, PWTTEST.  
Don't forget Vcc, GND on all chips.
